KTM Skene Dimmer Instructions

Squadron Dimmer Box (Optional): If you intend on using a KTM dimmer box with your kit, please review the following notes:

1) **Plug corresponding connector into stock KTM OEM harness.**
2) **Plug corresponding connector into Squadron/XL Pro light.**
3) **Take the connectors from photo 1 and plug the corresponding connector in line of the OEM flasher and OEM harness. This is a jumper to supply power to dimmer without having to splice or cut into the OEM harness.**
4) **Be sure to make sure that the Skene dimmer is securely fastened to the bike using either zip ties or the provided double sided tape.**
